System Overview

Deck Sorcery is a web based platform for Hearthstone card deck generation. The platform is targeted at Hearthstone players. Users are able to perform the tasks listed below:

User
<div>Deck Building:<ul style="list-style-type: none">• Generate optimized deck from User Defined Deck• Generate optimized deck from All Hearthstone CardsUser's Card Library:<ul style="list-style-type: none">• View User's LibraryHearthstone Card Library:<ul style="list-style-type: none">• View Cards by Hero Type</div>

User Interface

Flask is used as Deck Sorcery's front end user interface. The backend bespoke web application is coded in Python. The results are sent to Flask to display the results onto the web interface.

Requirements

Deck Sorcery supports the following web browsers:

- Internet Explorer 11
- Microsoft Edge 39 and above
- Firefox 53 and 52 ESR and above
- Google Chrome Version 59 and above
- Safari Version 10 and above

Deployment

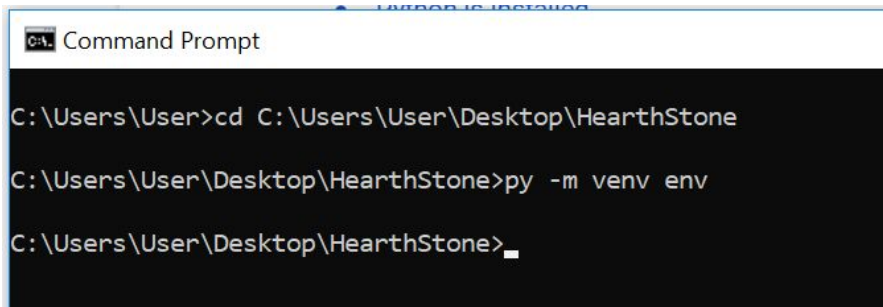

To run Deck Sorcery locally on a Windows Machine

Prerequisites:

- Python is Installed
- [Pip is installed](#)

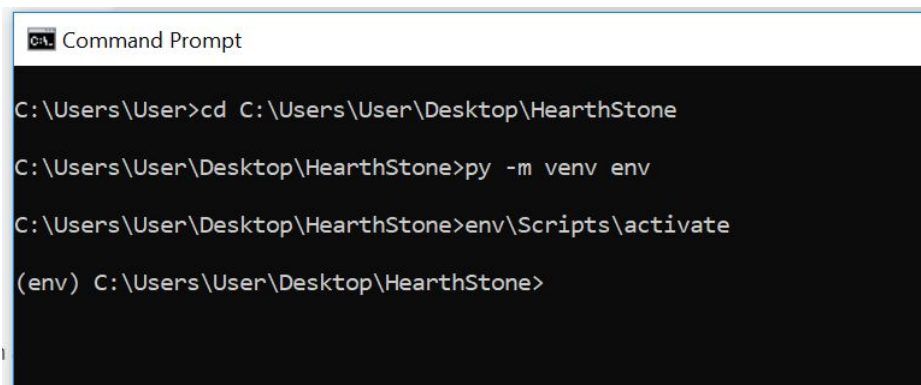

1. [Open Command Prompt](#)
2. `$ git clone //todo:git_url`
3. [Unzip folder](#)

4. `$ cd folder_location/`
5. Input `py -m venv env` and press enter

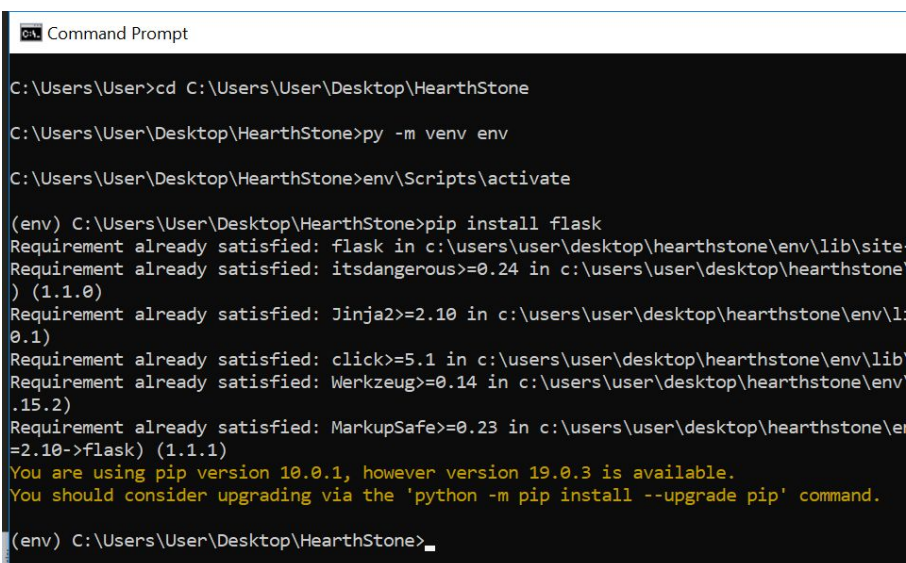

```
C:\Users\User>cd C:\Users\User\Desktop\HearthStone  
C:\Users\User\Desktop\HearthStone>py -m venv env  
C:\Users\User\Desktop\HearthStone>_
```

6. Input `env\Scripts\activate` and press enter

```
C:\Users\User>cd C:\Users\User\Desktop\HearthStone  
C:\Users\User\Desktop\HearthStone>py -m venv env  
C:\Users\User\Desktop\HearthStone>env\Scripts\activate  
(env) C:\Users\User\Desktop\HearthStone>
```

7. Input `pip install flask` and press enter

```
C:\Users\User>cd C:\Users\User\Desktop\HearthStone  
C:\Users\User\Desktop\HearthStone>py -m venv env  
C:\Users\User\Desktop\HearthStone>env\Scripts\activate  
(env) C:\Users\User\Desktop\HearthStone>pip install flask  
Requirement already satisfied: flask in c:\users\user\desktop\hearthstone\env\lib\site-packages (1.1.0)  
Requirement already satisfied: itsdangerous>=0.24 in c:\users\user\desktop\hearthstone\env\lib\site-packages (1.1.0)  
Requirement already satisfied: Jinja2>=2.10 in c:\users\user\desktop\hearthstone\env\lib\site-packages (2.10.1)  
Requirement already satisfied: click>=5.1 in c:\users\user\desktop\hearthstone\env\lib\site-packages (8.0.3)  
Requirement already satisfied: Werkzeug>=0.14 in c:\users\user\desktop\hearthstone\env\lib\site-packages (2.1.2)  
Requirement already satisfied: MarkupSafe>=0.23 in c:\users\user\desktop\hearthstone\env\lib\site-packages (2.1.0)  
(env) C:\Users\User\Desktop\HearthStone>_
```

8. Set the Flask App, Input `set FLASK_APP=main.py` and press enter

```
(env) C:\Users\User\Desktop\HearthStone>set FLASK_APP=main.py
```

9. Install the required packages

- a. `pip install sklearn`
- b. `pip install deap`

10. Run the Flask App, input `flask run` and press Enter

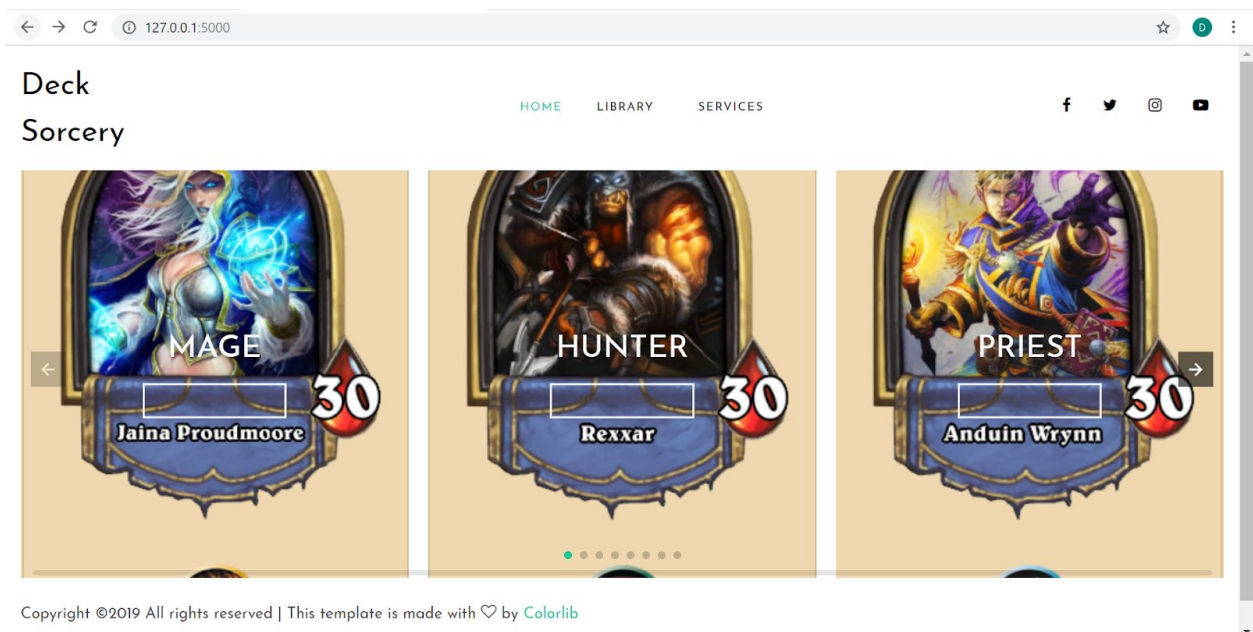

```
(env) C:\Users\User\Desktop\HearthStone>flask run
* Serving Flask app "main.py"
* Environment: production
WARNING: Do not use the development server in a production environment.
Use a production WSGI server instead.
* Debug mode: off
{'', 'PIRATE', 'MECHANICAL', 'MURLOC', 'ALL', 'ELEMENTAL', 'DRAGON', 'DEMON', 'BEAST', 'TOTEM'}
```

11. Navigate to the URL listed in Command Prompt

```
* Running on http://127.0.0.1:5000/ (Press CTRL+C to qu
```

Get Started

Open up your preferred browser and go to the URL "http://127.0.0.1:5000/" as shown below:

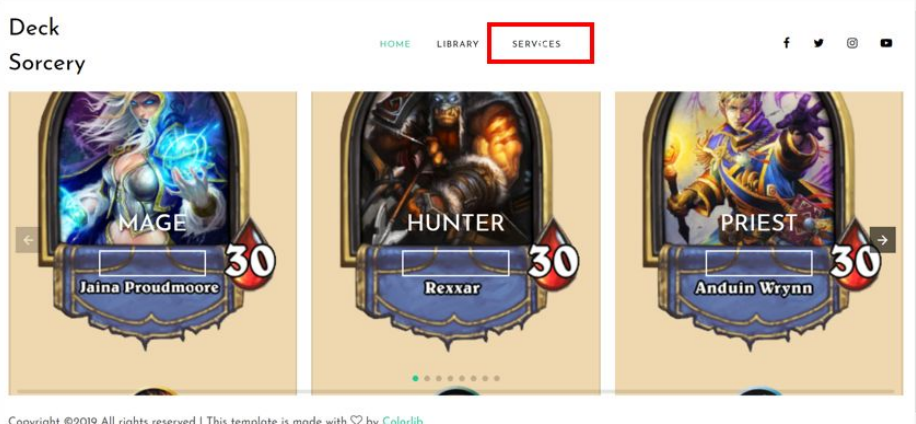

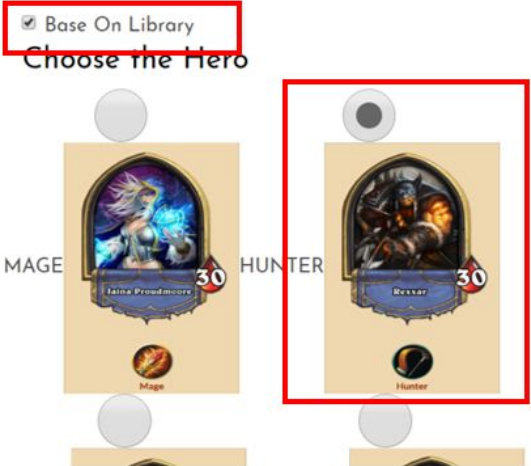

Walkthrough

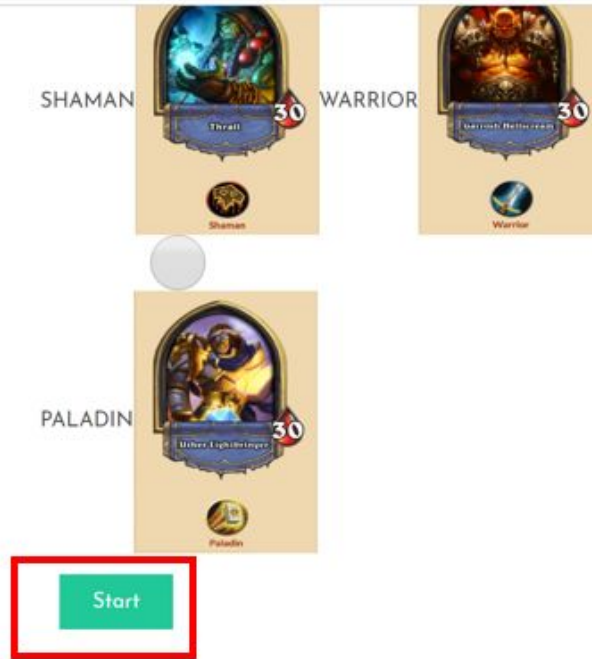

The following section will provide a step-by-step walkthrough of the various actions which players can perform within Deck Sorcery

Deck Building:

Generate optimized deck from User Defined Deck

<p>1. In the main page, select 'SERVICES'</p>	 <p>Copyright ©2019 All rights reserved This template is made with ♥ by Colorlib</p>
<p>2. Check the 'Base on Library' Checkbox</p> <p>3. Select the desired Hero Type of the Deck</p>	<h2>Generate My Deck</h2> <p><input checked="" type="checkbox"/> Base On Library</p> <p>Choose the Hero</p> 

4. Scroll down the webpage and select 'Start'

5. During the Deck Building process, the Screen will be blank. This is expected.
6. You can monitor the progress of the deck building in the command prompt window.
